

SEVENTEENTH

Notes of meeting held 10th. May 1987

Present: Messrs. Bond, Brooke, Hyde, Lardge, Wright.

Hoarding - David Lardge produced a drawing showing the proposed layout for the advertising on the hoarding. It was suggested that the various panels should be fixed in a less formal arrangement than that shown on the drawing with no spacing between the advertisements in order to produce a more authentic effect. David reported that work was in hand on the prestige 'removals' advert and that workshop capacity was being used to produce the Rexco and Lyons Tea ads.

Workshop wall facing - David Lardge reported that approximately £300 worth of materials remained from the supply used on the east wall of the workshop and that this material had a restricted use life. As the manufacturers would not take it back it was proposed, subject to Board's approval that this be used to complete the facing on the west wall of Depot II.

West side path - It was reported that MSC labour could not be used to complete the stone facing wall between picnic steps and bridge. It was proposed that a low railing be fixed by the gates at the north end of the depot wall to prevent the public walking directly out on to the street. Jim Soper to be asked to make proposals for completion of south end of depot wall, this to be a first priority.

Town End - Jim Soper to be asked to produce drawing for the proposed wall and archway to screen the First Aid hut.

Visitor entrance - After some discussion several amendments were proposed to the drawing dated 28.4.87 and David Lardge was asked to have prepared a further drawing incorporating these amendments for the next meeting.

PW - A memo to be sent to Richard Hartwell reminding him of the requirement to lift the point outside the Forge Bookshop at the end of the season, also to work on re-alignment of depot tracks for the traverser.

Cast iron urinal - It was proposed that this should be sited at the far end of the proposed traverser.

Tea Rooms - Work on the extensions was now completed and the screening between this building and the Members' Hut was practically complete.

Telephone kiosk - It was proposed that this should be sited adjacent to the main entrance cabin, where it would be of most use to visitors.

Next meeting - 26th. July at 2.30pm.
